Magic Gel for Brushes

For precision works is necessary to keep the tip of your brushes in a perfect state. This gel is indicated to keep the tip sharp and in perfect use condition with all brushes fibers compacted and never open or deformed. With this gel you will keep your brushes always like new ones after using and cleaning them (it can be used after the application of our ABT117 Magic Potion for Brushes or any other chemical or natural cleaner).

1 For sure many you will have found yourself that after using your brush, it has more or less this appearance. While you work you do not care about how your brush is going to end but you will want to have it perfect for the next time, don't you?. This is a picture of the brush after cleaning.

The product comes with a protection lid to have it ready to use as many times as you need, also it has a very nice smell, which is not very important but it helps.

3 This is the way to apply it, fairly simple, just dip it in the gel. This will help the tip to keep its proper shape for the next use.

4 Once the product has reached all the bristles you can remove the excess with paper cloth and also give it some shape, after you can leave it ready for the next time.

This is the appearance of the brush with the product applied. With this product it will be easier to start your work and also it will make your brush last longer.
